B.Tech – Computer Science & Engineering

ABOUT THE STUDENT

Candidate Profile

Roll Number

2410030XXX

Institute

IILM University, Greater Noida, U.P.

Programme

B.Tech CSE, Batch 2024–2028

Internship Domain

Data Science Master

Duration

8 Weeks | April – June 2026

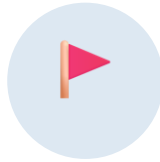

EduSkills, AICTE & Siemens

EduSkills Academy is an ISO 9001:2015 and ISO/IEC 20000-1:2018 certified organization working under the theme "Nation Building Through Skills." It partners with the All India Council for Technical Education (AICTE) to run the AICTE–EduSkills Virtual Internship Program under the patronage of the AICTE National Internship Portal. For the Data Science Master track, EduSkills collaborates with Siemens to deliver an industry-aligned curriculum covering data analysis, machine learning, Python, and business intelligence tools.

ISO Certified

ISO 9001:2015 & ISO/IEC 20000-1:2018
certified organization.

AICTE Patronage

Run under the AICTE National
Internship Portal.

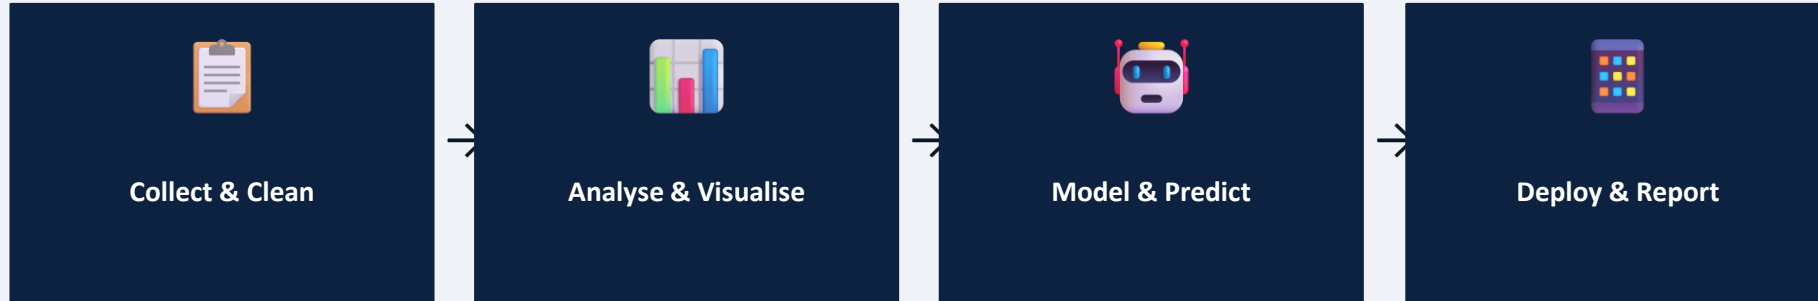

Supported by Siemens

Industry curriculum via Siemens
Industry Software.

Bridging Theory and Applied Data Science

Engineering students often learn data science concepts — statistics, machine learning, Python — as theory, without structured, hands-on exposure to real industry workflows. Tools like Power BI, Scikit-learn, Pandas, and Tableau are rarely practised end-to-end. Key skills such as data wrangling, model building, insight generation, and business dashboarding remain under-developed due to the lack of applied industry projects.

This internship addressed that gap — applying the full Data Science workflow:

What the Internship Set Out to Achieve

Data Analysis with Python

Use Pandas, NumPy & Matplotlib to clean, wrangle and explore real-world datasets.

Machine Learning Models

Build, train and evaluate predictive models using Scikit-learn algorithms.

Data Visualisation

Create interactive dashboards and visual insights using Power BI and Tableau.

Statistical Analysis

Apply descriptive & inferential statistics to draw evidence-based conclusions.

Feature Engineering

Design meaningful features to improve model accuracy and generalisation.

Business Intelligence Reporting

Integrate findings into actionable reports and BI dashboards for stakeholders.

The Toolkit Behind the Internship

Python

Core programming language

Pandas & NumPy

Data manipulation & analysis

Scikit-learn

ML model building & evaluation

Power BI

Business intelligence dashboards

Matplotlib / Seaborn

Data visualisation

SQL

Database querying

Tableau

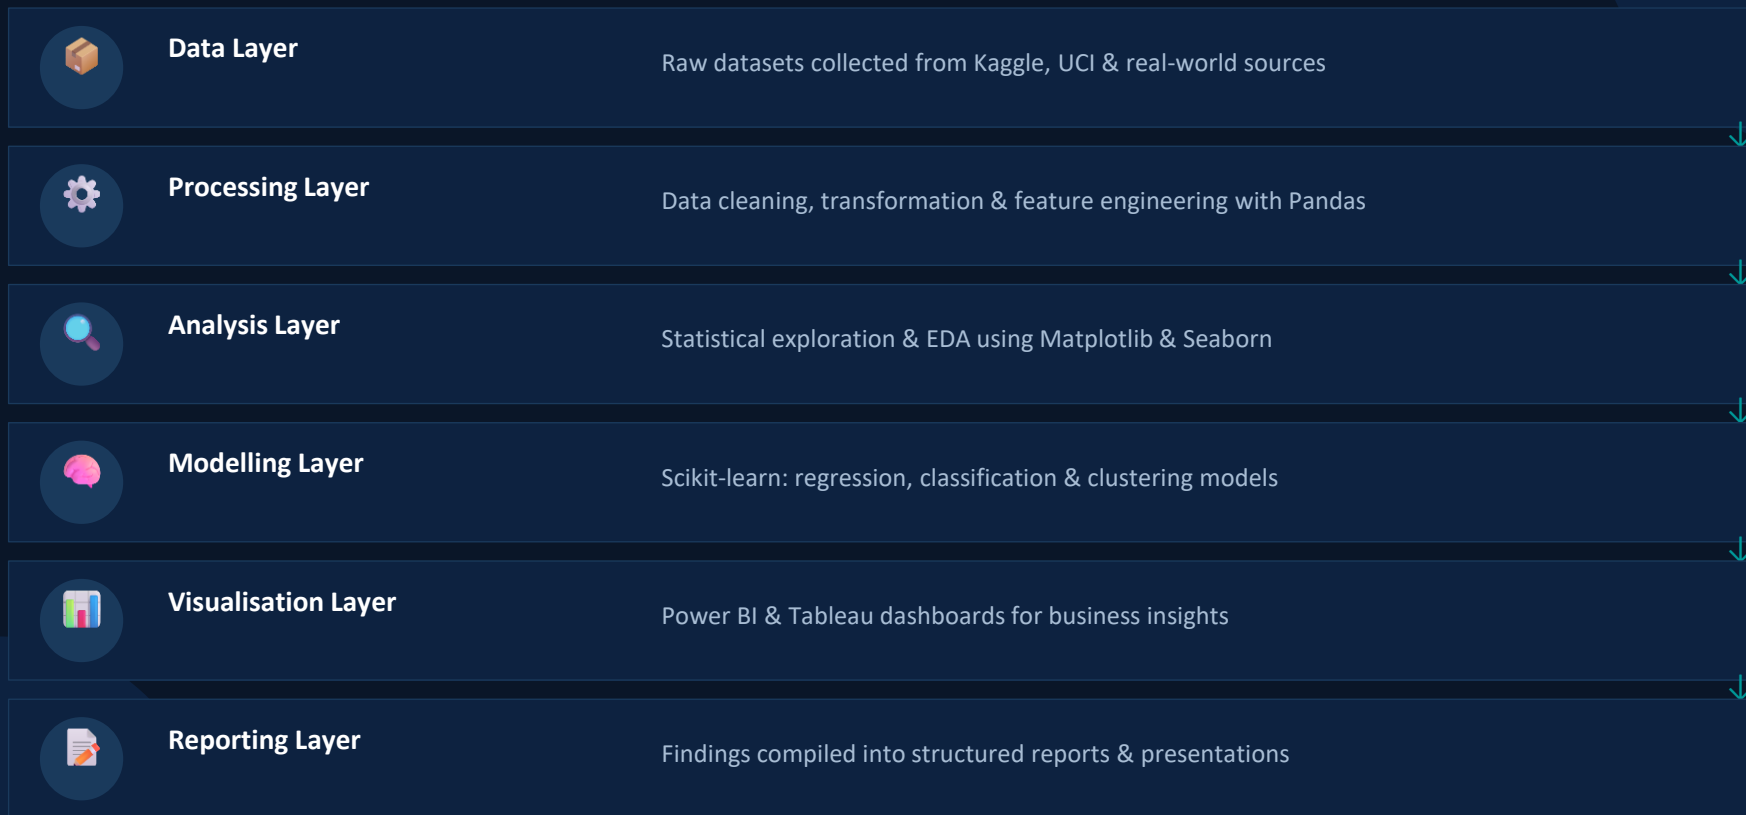

Interactive visual analytics

Statistics

Descriptive & inferential analysis

From Raw Data to Actionable Insights

The 8-Week Learning Journey

1

WEEK

Python for Data Science

NumPy, Pandas, Matplotlib fundamentals

2

WEEK

Exploratory Data Analysis

Data wrangling, cleaning & visualisation

3

WEEK

Statistical Analysis

Descriptive stats, hypothesis testing

4

WEEK

Machine Learning Basics

Regression & classification with Scikit-learn

5

WEEK

Advanced ML Techniques

Ensemble methods & model optimisation

6

WEEK

Power BI & Dashboarding

Business intelligence & interactive reports

7

WEEK

Capstone Project – Part 1

End-to-end DS project: data to model

8

WEEK

Capstone Project – Part 2

Dashboard & presentation of final insights

Skills & Capabilities Gained

Ability to perform end-to-end data analysis using Python (Pandas, NumPy) on real-world datasets

Practical experience building and evaluating ML models including regression, classification, and clustering

Hands-on exposure to creating interactive business dashboards in Power BI and Tableau

Capability to apply statistical techniques for data-driven hypothesis testing and insights

Skill to engineer meaningful features and optimise model performance with cross-validation

Completed all learning modules & badges; cleared the Final Credential Validation with an "Outstanding" grade

Successfully Completed

Grade

O – Outstanding

Certificate ID

4ee5b401368cefc601c9

Student ID

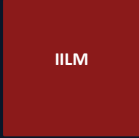

STU69975d61281d81771527521

Duration

8 Weeks | April – June 2026
